SUPER JUMPING FROG

This variation of the traditional jumping frog was designed by Yami Yamauchi and diagrammed by A.F. Barbour.

1. Start with a 3 x 5" file card. Fold a waterbomb base at one end.

2. (a) Valley-fold arms.  
   (b) VF lower edge to WBB.

3. VF sides to meet in middle.

4. VF back legs (this is the departure from the traditional model. The extra thickness gives it more spring.)

5. Pleet + turn over.

6. Push down on back + release - the frog will jump high + far. Fold a tiny one and it will surprise you.
